OBJECTIVE

Passionate Frontend Developer with a solid foundation in HTML, CSS, and JavaScript, and hands-on project experience. Eager to join a dynamic team, apply my skills, and contribute to innovative web applications while growing professionally. Seeking an entrylevel role to make a meaningful impact.

PROJECTS

PhotoShowdown (Web-based Image Comparison Game) (<https://photoshowdown.netlify.app>)

- Developed a web-based game where users compare two images and select their preferred one.
- Implemented click tracking to record and rank images based on their popularity.
- Designed a responsive layout to ensure mobile-friendly gameplay.
- Included features such as a ranking system, game reloading, and intuitive image comparisons.
- Utilized **HTML**, **CSS**, and **JavaScript** for the game's structure, styling, and logic.

ClimeAware (Real time Weather Information Application) (<https://climeaware.netlify.app>)

- Developed a real-time weather app using **JavaScript** and **APIs**.
- Integrated the **OpenWeatherMap API** to fetch weather data based on user location.
- Designed a clean, responsive UI with **HTML**, **CSS**, and **JavaScript**.
- Provided current weather details including temperature, humidity, and wind speed.
- Ensured cross-browser compatibility and mobile responsiveness.

UDAAN (Web based Flight Booking System)

- Led the development of a sophisticated flight booking platform.
- Employed **HTML** and **CSS** for visually appealing and user-friendly interfaces.
- Provided comprehensive search options for filtering flights by date, time, airline, and price.
- Enhanced user experience with intuitive design and robust features.
- Facilitated seamless browsing, selecting, and booking of flights.

Amazon HomepageClone (Clone of Amazon's Homepage)

- Recreated the Amazon homepage using **HTML**, **CSS**, and **JavaScript**.
- Focused on replicating the responsive design and layout of the original site.
- Employed **Flexbox** and **Grid** to create a flexible, mobile-friendly layout.
- Integrated **JavaScript** for interactive features such as hover effects and dynamic content.
- Achieved pixel-perfect accuracy in replicating the website's core elements and structure.
